

## **CMSC436 Project Proposal: Debate App**

### **Project Team 25**

- 1. Eric Gulich**
- 2. Terrell Davis**
- 3. Huu Nguyen**
- 4. Yusuke Sato**
- 5. Aarav Naveen**

### **App Description**

**Load into the app, initially authenticate, select preferences on various topics, pair with someone who disagrees with you, and debate live using text-based communication.**

**People have 2 minutes to respond.**

### **Minimal Goals**

- 1. That two people will be able to connect to each other and debate live.**
- 2. Create a matchmaking system for people to connect**
- 3. Messaging through text**
- 4. Timer**

### **Stretch Goals**

- Have video conversations**
- Rewards ex: achievements or badges**
- Friend system**

### **Project Timeline**

#### **Milestone 1**

- Login and user registration + a pop up topic quiz**
- Text Field where user can search topics and genres**

#### **Milestone 2**

- Peer to Peer connectivity**
  - Creation of a matchmaking system**
- Access to a Profile Tab**
- Creating a Ruleset**

### **Milestone 3**

- **Text based UI; live communication over text**
  - **Working instant messaging system**
  - **Timer**
- **Visually inviting graphics**

### **Final Submission**

- **Stretch goals completed, project submitted, and a demonstration scheduled.**
